

## **Customer Spotlight**

### **Christon Rollins C & J Optical - California**

I have owned a FastGrind system for 19 years and have been impressed how Super Optical has kept our system current for so long. The best thing they have done was to make our system approved by EyeMed as an 'in-house' lab.

Using our FastGrind system with EyeMed has been fantastic for our practice. In the past, EyeMed had been the best insurance of all the companies, but after they switched to the partner labs model, they became the worst of our

insurance providers. We were very discouraged and we saw a decrease in our reimbursements.

Since signing up our FastGrind system with EyeMed we can say EyeMed is back to being the better program and has made our use of EyeMed more palpable and profitable.
